

DIGITIZATION DIALOGUE

A Dialogue On The Opportunities And Challenges Companies, Academia And Society Face In The New Digitization World

Digitisation and the Internet of Things is one of the most sought after topics in, among many fields, manufacturing. Analysis firm Cartina says, in an in-depth study with 41 CIOs, that “there is a great deal of variation on where companies are in the digitalisation process”. Traditional industries such as manufacturing are among the ones lagging behind, whereas sectors such as media, travel are among the first adopters, followed by government authorities and municipalities

Join and listen to some of the most experienced business leaders discussing the challenges and opportunities facing the industry, authorities and academia in the near future. We welcome business associates, students, faculty members and high level authorities
