

**Deccan Education Society's
FERGUSSON COLLEGE (AUTONOMOUS),
PUNE**

**Syllabus
for**

S. Y. B. A. Applied Statistics

[Pattern 2019]

(B.A. Semester-III and Semester-IV)

From Academic Year

2020-21

Deccan Education Society's
Fergusson College (Autonomous), Pune

S.Y.B.A. Subject (Pattern 2019)

From academic year 2020-21

Particulars	Name of Paper	Paper Code	Title of Paper	No. of Credits
S.Y. B.A. Semester III	Theory Paper – 1	STA2301	Probability Theory and Discrete Probability Distributions	3
S.Y. B.A. Semester IV	Theory Paper – 1	STA2401	Continuous Univariate Distributions and Applications of Statistics	3

S. Y. B. A. Semester III		
Title of the Course and Course Code	Theory and Discrete Probability Distributions (STA2301)	Number of Credits: 03
Course Outcomes (COs)		
On completion of the course, the students will be able to:		
CO1	Recall basic knowledge of probability, permutations and combinations.	
CO2	Explain sample space for random experiment and identify events and their types.	
CO3	Apply theorems of probability to compute probability of different types of events.	
CO4	Explain classical definition of probability, axioms of probability, conditional probability and independence	
CO5	Assess the properties of univariate discrete random variables.	
CO6	Formulate special discrete probability distributions.	

Unit No.		Title of Unit and Contents	No. of Lectures
I		Permutations and Combinations	(5L)
	1.1 1.2	Definitions of permutation and combination Relation between permutation and combination (i) ${}^n C_r = {}^n C_{n-r}$ (ii) ${}^n C_r + {}^n C_{r-1} = {}^{n+1} C_r$	
	1.3	Examples and Problems	
II		Probability	(20)
	2.1 2.2 2.3 2.4	Concept and definition of union, intersection of two sets, complement of a set Concept of random experiment, sample space, event Definition of event, complementary event, elementary event, certain event, impossible event, problems on sample space, events for a given random	

	<p>2.5 2.6 2.7</p> <p>experiment Classical definition of probability and its limitations Probability model Axioms of probability Theorems of Probability (Explain through illustrations)</p> <p>(i) $P(A) + P(\bar{A}) = 1$ (ii) $0 \leq P(A) \leq 1$ (iii) $P(\Phi) = 0$ (iv) If $A \subset B$ then $P(A) \leq P(B)$ (v) $P(A \cup B) = P(A) + P(B) - P(A \cap B)$ (vi) $P(A \cup B) \leq P(A) + P(B)$ (vii) Statement for 3 events for (v) and (vi)</p> <p>2.8 2.9 2.10 2.11</p> <p>Definition of conditional probability Multiplication theorem on $P(A \cap B)$ Concept and definition of independence of two events Pairwise independence and complete independence in case of three events</p>	
III	Uni-variate Discrete Probability Distributions	(8L)
	<p>3.1 3.2 3.3 3.4 3.5 3.6</p> <p>Definition of a discrete sample space and discrete r.v. Definition of probability mass function (p.m.f.) of a discrete r.v. Definition of expectation of a discrete r.v. and expectation of a linear combination of discrete r.v. X. Definition of variance of discrete r.v. X. Properties of expectation and variance Examples</p>	

IV	Special Discrete Distributions		(15L)
	4.1	Discrete uniform distribution: p.m.f. mean and variance. Illustrations of real life situations where this distribution can be applied	
	4.2	Binomial distribution: Notation $X \sim B(n,p)$. p.m.f., mean and variance, additive property (derivations excluded). Illustrations of real life situations where the distribution can be applied. Computation of probabilities of events related to binomial r.v.	
	4.3	Poisson distribution: Notation $X \sim P(m)$ p.m.f., mean and variance, additive property (derivations excluded), Illustrations of real life situations where the distribution can be applied. Computation of probabilities of events related to a Poisson r.v.

S. Y. B. A. Semester IV		
Title of the Course and Course Code	Continuous Univariate Distributions and Applications of Statistics (STA2401)	Number of Credits: 03
Course Outcomes (COs)		
On completion of the course, the students will be able to:		
CO1	Define vital statistics and identify continuous univariate random variable, distribution function and its properties.	
CO2	Compute probability of different events based on continuous probability distributions.	
CO3	Illustrate some special continuous probability distributions, and their properties to real life situations.	
CO4	Analyze the time series by estimating seasonal indices.	
CO5	Evaluate partial regression coefficients, multiple and partial correlation coefficients.	
CO6	Explain demographic ratios, mortality and fertility rates.	

Unit No.		Title of Unit and Contents	No. of Lectures
I		Continuous Univariate Distributions	(16L)
	1.1	Definition of continuous sample space, definition of continuous type of r.v. through p.d.f., Definition of distribution function of continuous type r.v. Statement of properties of distribution function of continuous type r.v.s	
	1.2	Exponential Distribution: Probability density function (p. d. f.) $f(x) = \begin{cases} \alpha e^{-\alpha x} & x > 0, \alpha > 0 \\ 0 & \text{otherwise} \end{cases}$ Notation : $X \sim \text{Exp}(\alpha)$ Statement of mean and variance, Statement of lack of memory property	
	1.3	Normal distribution p.d.f. $f(x) = \frac{1}{\sigma\sqrt{2\pi}} \exp\left(\frac{-1}{2\sigma^2} (x-\mu)^2\right), -\infty < x < \infty, -\infty < \mu < \infty; \sigma > 0$ Notation: $X \sim N(\mu, \sigma^2)$	

		Standard normal distribution, statement of properties of normal distribution, the graph of p.d.f, nature of probability curve Statement of additive property, Computation of probabilities	
II		Multiple Regression Plane, Multiple and Partial Correlation Coefficient (using tri-variate data)	(10 L)
	2.1	Notion of multiple regression plane	
	2.2	Given total coefficients of correlation and standard deviations, fitting of regression plane by the method of least squares (statement only) and finding estimated values	
	2.3	Given sums, sums of squares and sum of squares of deviations from respective mean etc. fitting of regression plane, and estimated values by the method of least squares and finding the estimated values	
	2.4	Notion of multiple correlation coefficient $R_{Y.X_1X_2}$ partial correlation coefficient $r_{YX_1X_2}$ and its computations	
III		Time Series	(12L)
	3.1	Meaning and usefulness of time series analysis	
	3.2	Components of a time series: trend, seasonal, cyclical and irregular variations	
	3.3	Additive and Multiplicative Models	
	3.4	Methods of estimating seasonal components (i) Methods of averages (ii) Ratio to trend obtained by moving averages (iii) Link relative methods (iv) Ratio to trend by least square method	

IV		Elements of Demography	(10L)
	4.1	Introduction, need of vital statistics. Methods of collecting	
	4.2	vital statistics	
	4.3	Demographic Ratios	
	4.4	Mortality Rates: Crude Death Rate(CDR), Standardized Death Rate (STDR)	
	4.5	Fertility and Reproduction Rates: Crude Birth Rate (CBR), General Fertility Rate(GFR), Age-specific Fertility Rate(ASFR).Total Fertility Rate(TFR), Gross Reproduction Rate(GRR), Net Reproduction Rate(NRR)	
		Examples and problems
